# the concept

## THE COLOURS OF WELL-BEING

**Natural Mix** is the new Allegrini line inspired by the most enveloping benefits of **colour therapy**. An harmonic concept according to which the perception of colours creates a **stimulating and rebalancing effect** on people's organism. The colour, which accompanies the authentic formulations, therefore becomes the protagonist, as a source of luminosity and energy. A choice that gives the body sensations and nuances of light **well-being**. Each reference of Natural Mix is thus enriched with a dedicated and identifying colour, which recalls the most characteristic element of each formula, matching the **precious ingredients of the Mediterranean world**. Grape polyphenols, rice extract, olive oil, fig fragrance, trace elements from the sea, aloe vera juice, orange and cinnamon aroma and also green tea and ginkgo biloba extracts. Each guest can experience an **authentic olfactory** journey on his or her skin, to experience relaxing emotions, derived as much from the natural ingredients as from the colours.
